CORPORATE

40 years ago, Steelhead was created for a single purpose - to design and manufacture equipment for the bottled water industry. Focusing on returnable bottles and water treatment, Steelhead built a first-class line of equipment. Over the years, we've built an excellent reputation that comes not only from our equipment design, but also the way we back it up. Service and support to our worldwide customer base is our priority and it is the reason that we have maintained a top place in the industry for four decades.

Steelhead is a privately owned company incorporating engineering, design, manufacturing, sales, administration, customer service and support all from our San Antonio Location.

PRODUCT CAPABILITIES

Bottling Systems:

One Operator and High Speed

Steelhead has focused from the beginning on development and delivery of 5 gallon bottling systems for the bottled water industry. Even prior to polycarbonate and PET, Steelhead was making washers, fillers, cappers, and conveyors for glass bottles.

- **One operator Ultra Series:**
150-350 bottles per hour

- **High speed 3 and 5 gallon solutions:**
450-3000 bottles per hour

Water Treatment

From high-efficiency ozonation packages to reverse osmosis systems, we offer sterilization, purification, and filtration solutions that fit your needs. Steelhead's solutions blend technical excellence with uncompromising standards for water treatment options that are second to none.

- **Ozone Systems**
- **Mineral Injection Systems**
- **Reverse Osmosis Systems**
- **UV Systems**
- **Filtration Systems**

Support Equipment

Every bottling line needs support equipment, and you can turn to Steelhead for recommendation and supply on items ranging from air compressors to ink jet coders. We will incorporate equipment from the finest suppliers into your bottling line design, and incorporate costs right into our quote, so that you don't have to source multiple suppliers yourself.

Other Capabilities

- **De-Cappers**
- **Quality Control Platforms**
- **Material Handling**
- **Utility Support Equipment**
- **Pre- Owned Systems**

EcoTex: Laundry Oxidation Systems

Steelhead is moving outside of bottled water with its breadth of ozone application experience with the introduction of the Eco-Tex laundry oxidation system.

THE STEELHEAD DIFFERENCE

Long before bottled water delivery became a world-wide trend, we were building systems that helped our customers provide clean, safe, quality sources of drinking water for companies, communities and families all over the world. We've constantly put resources back into research and innovation, working to move the industry forward with revolutionary technologies like our ozone sterilization and mineral injection systems, while always trying to find better and more efficient equipment and processes. With equipment placed in over 60 countries and an extensive customer base that is growing by the day, it is easy to see that Steelhead is the leader you need in the industry. Your success is our #1 priority. Give us a call today, or come by and visit anytime.
